**IMPORTANT:**

Do not attempt to install the wire guard until the smoke sensor has been tested and in proper working order according to the manufacturer's installation instructions furnished with the sensor unit.

**INSTALLATION:**

1. Center the wire guard over existing smoke detector.
2. Mark and drill (4) mounting holes (see pictorial for size). Insert anchor into ceiling. **NOTE:** If lag shields and lag bolts are used, make sure anchor is flush with surface. Position guard, insert lag bolts and tighten. Length of bolt should be selected to assure full thread engagement in anchor.
3. STI-8170 BACKPLATE - STI recommends the use of this plate on all unstable mounting surfaces.
4. Insert screws through clamps and backplate (if used) and screw into anchors; but do not tighten.
5. Position guard over detector, slide clamps onto top wire of guard and tighten screws.

**SERVICE:**

1. Periodic cleaning of the smoke detector is required so dust and other matter do not accumulate.
2. To service the smoke sensor unit, loosen but do not remove the (4) screws, rotate clamps, and carefully remove wire guard.

**OPTIONAL ACCESSORIES:**

1. SUB-82 - #8 X 1 1/2" spanner tamper resistant stainless steel screw kit
2. 19038 - #8 spanner bit with 5/16 hex drive
