

# STI MOTION-ACTIVATED DRIVEWAY ALERT

## Helps Provide Great Inside or Outside Security

This Motion-Activated Driveway Alert requires no wiring. When the sensor detects motion it will turn on a light, sound the alarm or both. The compact Plug-in Receiver is for indoor use only. It fits neatly against a wall or behind furniture. When a lamp is plugged into the receiver, the included wireless remote can be used to activate the receiver. This allows the lamp to turn on as someone enters a room, avoiding tripping over unseen objects. It can control up to 600W of incandescent lighting.

The wireless motion sensor is weather-sealed for long life and will send a signal to the receiver up to 100 feet away. Requires 4 AA alkaline batteries (not included). The sensor can be used indoors or outdoors in temperatures ranging -20°F to 120°F. It has an infrared detection zone of 140° wide and 60 feet deep. The activation switch allows day and night operation and uses 4 AA alkaline batteries. Timer switch allows user to choose length of time for lamp to stay on: 6 seconds, 3 minutes or 10 minutes. Selectable codes block interference from outside signals.

HS3605

## Features

- Motion activated light control with alarm.
- No wiring required.
- Weather-sealed sensor for long life.
- Great for inside or outside security (turns a lamp on when someone enters the driveway – giving the illusion someone is home).
- Has an infrared detection zone of 140° wide and 60 feet deep.
- Detects motion up to 100 feet away.
- Timer switch allows user to choose length of time for lamp to stay on: 6 seconds, 3 minutes or 10 minutes.
- Selectable codes block interference from outside signals.
- Includes Plug-in Receiver, Wireless Motion Sensor and Wireless Remote.
