

STI Safe Pool Alarms

S089

PRODUCT OVERVIEW

This easy-to-install system helps prevent tragic childhood pool deaths. Safe Pool provides alarm protection to windows or home doors leading to potentially dangerous pool and spa areas. The Safe Pool mounts to both wood or metal doors/windows. When children open the protected door or window more than one inch, the unit will sound its built-in 110 dB high output alarm. The pass/reset button allows entry or exit for adults without sounding alarm, the unit will then reset automatically to resume protection.

HOW IT WORKS

Simply plug in AC adapter, mount the alarm next to the door/window to be monitored, line up the magnetic switches as specified in the instructions and the unit is ready for operation.

FEATURES

- High output 110 dB instant alarm siren.
- Includes mounting hardware for both wood or metal doors/windows.
- Alarm sounds continuously until pass/reset button is pressed.
- For indoor use.
- 9 volt AC adapter operation.
- Pass/reset button provides convenient adult pass-through operation (allows for a 10 second leeway).
- Complies with UL2017.
- Alarm measures approximately:
1 5/8" x 4 3/4" x 1 3/4" deep.
