

Mugger Stopper[®] Plus

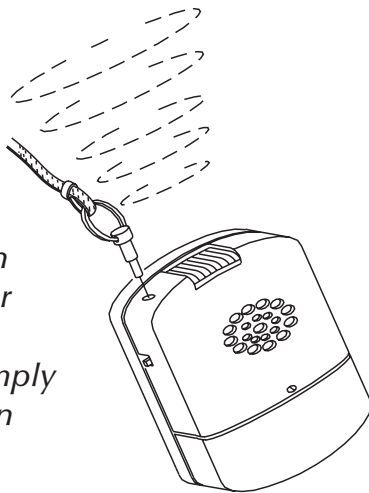

PERSONAL PROTECTION ALARM

This device represents a significant step forward in personal protection. That's because Mugger Stopper Plus helps stop mugger attacks or harassment in two ways.

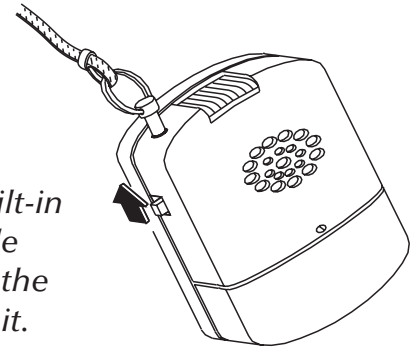

1. With an ear-piercing 120 dB alarm.
2. With an attention-grabbing strobe light.

This two-way action also makes it much more effective in summoning aid in case of an injury or fall. In addition, the built-in flashlight helps you find your keys or the keyhole on those dark, moonless nights.

*To activate both
Mugger Stopper
Plus alarm and
strobe light, simply
pull out plug on
top of unit.*

*To turn on built-in
flashlight, slide
button up on the
side of the unit.*

CAUTION:

The Mugger Stopper Plus alarm is extremely loud. For safety sake, never place the unit close to your ears.

To test alarm, direct the unit away from you at arms length and pull out plug on top of unit.

To replace battery:

Remove small screw on front of unit and push with thumb where indicated to take off bottom section. After replacing 9-volt battery, slide bottom section back into place and replace screw.
